

INTERNAL ONBOARDING • 2025

Welcome to Debug Depot

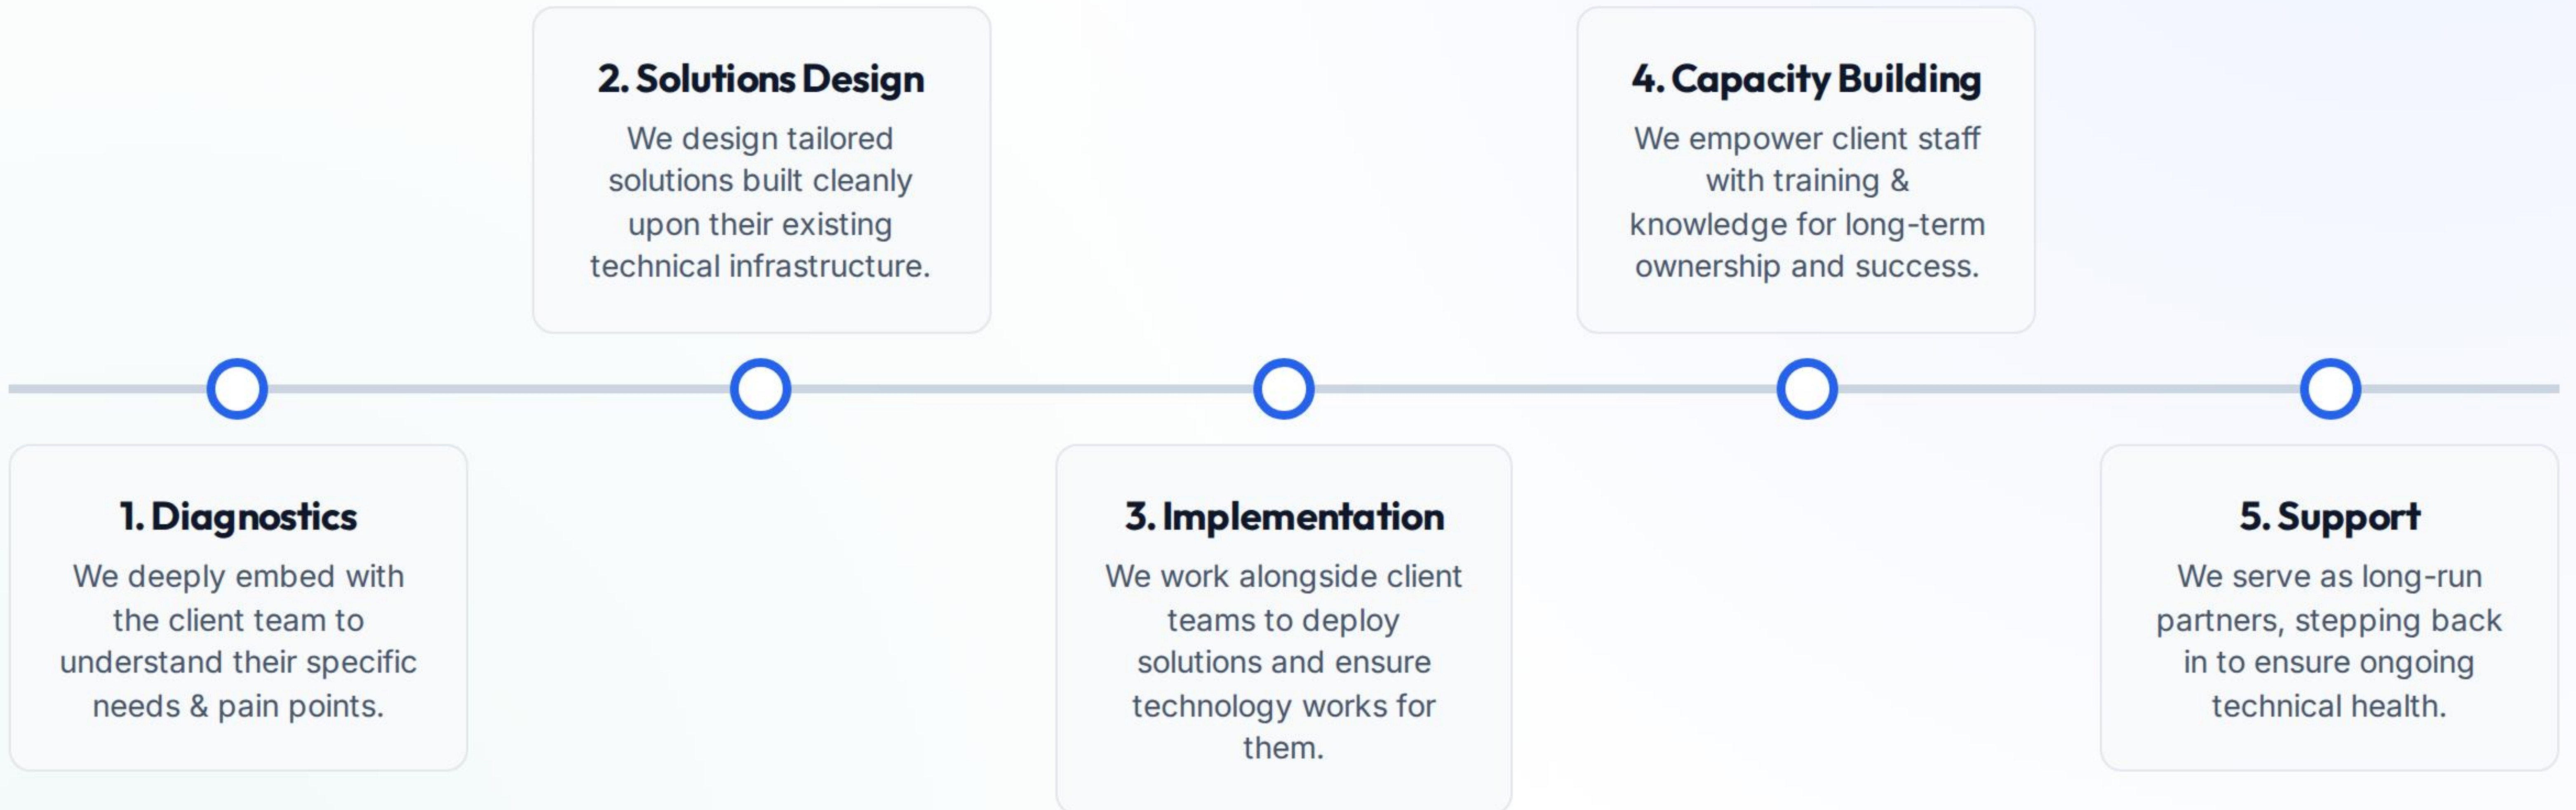

Your guide to our mission, core client services, technical process, and company capabilities.

Our Shared Mission

**"We empower small businesses to work smarter,
faster, and more securely."**

— DEBUG DEPOT CORE PURPOSE

Our 5-Step Lifecycle

Core Capability Pillars

1. Data & Analytics

Transforming raw data into strategic assets and robust measurement frameworks for data-driven decisions.

2. Workspace Admin

Providing comprehensive, hands-on Google Workspace Administration as a complete technical solution.

3. Website & Local SEO

Ensuring clients are discoverable in local search while maintaining fast, reliable user experiences.

Pillar 1: Data & Analytics

Raw Data to Strategic Asset

At Debug Depot, we help clients transform unstructured data into a structured business asset through custom measurement frameworks.

Actionable Intelligence

We focus on delivering actionable insights and clear strategic recommendations rather than simply presenting raw numbers.

Data & Analytics Services

- ✓ **Google Analytics 4 (GA4) Custom Configuration:** Custom, event-driven data layers that go far beyond default "Enhanced Measurement" for tracking.
- ✓ **Looker Studio Interactive Dashboards:** Dynamic, interactive dashboards that serve as a single source of truth powered by live data.
- ✓ **Actionable Data Interpretation:** Translating analytics data into direct strategic insights and practical recommendations.

Pillar 2: Workspace Admin

Hands-On IT Leadership

A complete Google Workspace Administration service designed to act as our client's total technical partner and infrastructure backbone.

Security & Administration

Conducting regular audits and security configurations to protect client accounts, communications, and digital resources.

Workspace Admin Scope

User Lifecycle

Managing the entire lifecycle for account users, including seamless onboarding, password management, and compliant offboarding.

Application Control

Controlling access to core Google Workspace services (Gmail, Calendar, Drive) and third-party apps via user or group permissions.

Security Settings

Configuring Two-Step Verification (2SV), Context-Aware Access (CAA), and advanced spam/phishing protection mechanisms.

Pillar 3: Website & Local SEO

Local Search Visibility

Ensuring our client businesses stand out in local search results, turning local inquiries into reliable business growth.

Performance & UX

Combining tag infrastructure with fast, reliable web performance to deliver superior user experiences for clients.

Website & SEO Services

Google Business Profile (GBP) Management: Treating GBP as a critical marketing channel and first local touchpoint for customer trust.

Google Tag Manager (GTM) Implementation: Centralizing tracking to allow accurate and scalable data collection without constant developer intervention.

Actionable Local SEO Advice: Providing ongoing, practical guidance to help clients climb local search rankings in target areas.

Capabilities Matrix

Capability Area	Core Focus	Value Delivered
Data & Analytics	GA4, Looker Studio, Custom Data Layers	Single source of truth for client decisions.
Workspace Admin	Lifecycle, Group Access, 2SV/CAA Security	Operational efficiency and robust cyber safety.
Website & Local SEO	GBP Management, GTM Implementation	High search discoverability & clean tracking.
5-Step Lifecycle	Diagnostics to Capacity Building & Support	Sustainable technology and client self-sufficiency.

Ready for what's next?

Let's talk. Thank you and welcome to the team!
